Banknote counting machine TS2650B - 2D

/Two-dimensional/:

- **Two-dimensional banknotes control identity - width and thickness;**
- **Works equally well with banknotes of different currencies - BGN, Euro, USD etc. in a different banknote condition /new or used/;**
- **Built-in automatic UV, IR, MG/MT counterfeit money detectors;**
- **Mechanism from China, electronics from Bulgaria;**
- **European certificate CE;**
- ***Best price/quality ratio.***

Advantages over other models:

- **"Value counter" /valuation/ - "Total" for Euro banknotes:**
- **The screen displays total sum in Euro when counting Euro banknotes of different or same nominal value at once.**
- **100% secure control of Euro banknotes, based on reading their nominal value in the security thread, there is no way to pass a counterfeit Euro.**
- **Ability to continue counting after error appears by removing the number of banknotes shown on the display.**
- **Precise width control - up to 2mm. prevents mixing banknotes of different nominal values.**
- **Very low noise level when working**
- **Auto-adjustment of sensors when contaminated, very rarely needs cleaning.**
- **Beautiful rotating display, 7 buttons with simple functions;**
- **Endurance of continuous loading;**

Function "Total Euro"

General characteristics:

- Speed of counting - 1200 notes/minute;
- Batch/free mode;
- Accumulation mode /ADD/ for normal and total count;
- Detection of half, double banknote, banknotes moving too close, banknotes with different sizes /width and thickness/, counterfeit banknotes;
- Programmable levels of detection;
- Dimensions: Width: 23 cm., Height: 20 cm., Length: 32 cm.;
- Weight /Gross weight/: 6.5 kg.

Warranty: Two years

Delivery time: 10 working days
